Competitive Narrative Game System

---

1. QUICK START

Objective of the Game

The player who achieves one of the following conditions wins:

1. **Elimination Victory**: Force the opponent to flip cards from their Arsenal when they have none left.
2. **Final Victory**: Successfully play a Final card by fulfilling its conditions.

Setup

1. Choose your Annunaki faction (determines your starting Protagonist).
2. Shuffle your 60-card Arsenal.
3. Draw cards equal to your Protagonist's Hand Value.
4. The player with the highest Protagonist Value starts.
5. Your starting Climax is 0.

---

2. BASIC RULES

Key Terms

- **Arsenal**: A 60-card deck representing your narrative capacity. If it runs out, you lose.
- **Narrative Table**: The area where successfully played cards are placed.
- **Dead Archive**: The discard pile.
- **Protagonist**: Main character with special abilities and initial hand value.
- **Climax**: Narrative intensity level, sum of the Narrative Impact on your Table.

Card Values

- **Climax Cost (C)**: Top right corner. Your Climax must equal or exceed this to play the card.
- **Narrative Impact (I)**: Bottom right box. Represents damage and your Climax gain when played.

---

3. CARD TYPES

3.1 PROTAGONISTS (Starting Card)

- Defines faction (Enkite, Enlilite, Mardukian, etc.)
- Provides Hand Value (5–8 cards)
- Has a special ability (once per turn)
- Determines who starts the game

3.2 SCENES (Yellow Cards)

- Represent narrative events that damage the opponent
- Subtypes:
  - Horror
  - Sci-Fi
  - Action
  - Drama
  - Mystery
- Can only be played on your turn. If not reversed, they add Climax.

3.3 PLOT TWISTS (Red Cards)

- Reverse the opponent's Scenes and end their turn
- Require Climax ≥ their Cost
- May have genre or impact restrictions
- Can be flipped from the Arsenal when taking damage

3.4 ARTIFACTS (Blue Cards)

- Modify the game state
- Subtypes:
  - Relics
  - Rituals
  - Tablets

3.5 REVELATIONS (Purple Cards)

- Special effects with conditions
- Some are played face down and activate when conditions are met
- Can alter rules

3.6 FINALS (Gold Cards)

- Conditional victory cards
- Very high Climax (80–150)
- Max 2 per Arsenal

---

4. GAME FLOW

Start of Turn

1. Resolve initial effects
2. Use Protagonist ability (optional)
3. Draw one card

Main Turn

You may, in any order:

- Play a Scene
- Play an Artifact
- Play a Revelation
- Use Protagonist ability
- Activate effects on Table

IMPORTANT:
If a Scene is not reversed:

1. Its effects apply
2. Opponent flips cards = Narrative Impact
3. It goes to your Table and adds Climax
4. You may keep playing

Turn ends if:

- Opponent reverses your Scene
- You can't or don't want to play anymore
- You successfully play a Final

Taking Damage

Flip cards from the Arsenal = damage received.
If you flip a compatible Plot Twist and have enough Climax:

- You stop the damage
- Opponent's turn ends
- The Scene remains on their Table

---

5. SPECIAL MECHANICS

Dual Archetypes

Each card has two archetypes defining synergy:

- Sci-Fi / Horror
- Action / Drama
- Mystery / Mythos

Narrative Resonance

Bonuses for playing coherent archetype cards:

- 3 cards = +1 card draw per turn
- 5 cards = Scenes of that type cost 10 Climax less

Narrative Impact Value (NIV)

- If opponent reverses your Scene by flipping cards, draw = NIV

Timelines

Available Eras:

- Pre-Diluvian
- Post-Diluvian
- Modern Era
- Near Future

Some cards only interact within their era.

---
